

EPICS FINAL PRESENTATIONS GUIDELINES

Here is a recommended format and content for your final presentation (you may modify as you see appropriate for your project). Use a 5-7 minute slide presentation. Allow an additional 2-3 minutes for Q/A. It is highly recommended that all team members participate in the final presentation explaining their contribution to the project.

- a) Team Introduction (team members, roles)--who you are
- b) Client brief description (organization, mission, contact person)--who is your client
- c) Describe the original requirements from your client--what they asked you to do
- d) Briefly describe what you accomplished this semester and how--give a brief live demonstration of your work, if applicable
- e) Briefly discuss your recommendations for future work—a list of useful features/extensions
- f) Summarize your experience from this project--technical and non-technical lessons learned
