

This folder contains all the information we were given to make the mobile application. We created a nosql database in order to store the information effectively.

This is an example of the format in which we stored information about an artist

```
1 {
2   "_id": "7CWw0Jv34",
3   "name": "Yara Cluver",
4   "artist_of": "CT Scans",
5   "link": "",
6   "desc": "A photographer and book artist, Clöver studied at the Cooper Union School of Art in New York City and received an M.F.A. in photography from Indiana University in 1997. Her main body of work explores the
body\u2019s transformation through time and experience. She is particularly interested in how the materials of the medical world intersect with the materials of the body. Clöver is currently the associate director
and the Collins Living-Learning Center at Indiana University, where she teaches courses on the artist\u2019s book and on the relationship of art to community. Her photo work has been exhibited through the United
States and Brazil, and her artist\u2019s books are in several collections of major American Universities.",
