## CS283 Simulation Bugs/User Stories

### Check In

- Come up with standardized way of writing DOB (control)
- Notes field | Flag of patient
- Add note to check in screen
- Add search box (ABC scrubber)
- Duplicate finder for check in
- Save button disappeared randomly – closed out of app and save button was there
- Not able to open patient in patient directory

### Waiting List

- need to show chief complaint (purpose of visit)

### Triage

- search box for patients
- edit blood pressure
- change lb to kg
- separate boxes for systolic/dystolic blood pressure
  - ex. 122/70 -> 122 | 70
- height feet/inches in separate boxes
- can't click/open visit in triage

### Pharmacy

- Needs to scroll with keyboard showing (check-in + triage)
- connect medication to send to pharmacy
  - name
  - medication
  - with diagnosis
- patient med info view controller needs current medications that were written in check-in + triage -> carry this over with pharmacy form too

### Other:

Search bar doesn't work when hitting search

Unable to put in stop date for meds

When typing in meds from doctor, not getting sent to pharmacy
