Sprint 1 goals

- Meet with client at WFYI
- Make a Trello Board
- Design Epics Website
 - Introduction, team members, picture, etc.
- Gather all information from past semester
 - Github
- Establish a plan for Database management
- Move code to GitHub for increased productivity and ease of updating the code base

Client Meeting

- Discussed with Chris and Jessica the current project's state and possible ideas for the future
- Learned that WFYI is losing the ownership of this web page in May
 - If this project isn't in a live state by May then it won't be released and all work will be discontinued
- Ate some Polish chocolate
 - It was good

What we are doing next

- Building a Microsoft Azure database to allow saving of data from flowers
- Deciding whether to continue with the 3d modeling idea or trying to update the current project to a more usable state
 - If yes for 3d: Looking into Javascript libraries for 3d modeling and environment builders
 - If not: discuss with the WFYI team about possible improvements to the current version
